Easy-GOing

## SYSTEM DESCRIPTION

### A SYSTEM ALWAYS MORE EASY-GOING

E-GO system represents the essence of Lovato's innovation and it has been designed for petrol engines from 2 to 4 cylinders. By selecting components, which perfectly complimented each other, the system is able to guarantee reliability and performance.

E-GO system uses the multipoint sequential injection technology: the injectors, controlled by the ECU, enter the gas into each cylinder and strictly replicate what happens during petrol operations.

E-GO system contains all the functions required to ensure an unchanged driving experience of your car.

More than 6 million people rely on Lovato to make the planet a better place.

Then what are you waiting for?

### LPG MAIN ADVANTAGES

#### Saving in fuel cost

*Toroidal-shaped tanks can be fitted into the space designed to hold your spare wheel and don't take up load space*

*LPG vehicles fitted with safety devices compliant with UN ECE 67 R-01 regulation can be parked in underground garages, down to the first level*

*LPG service stations are widely distributed over the country and along motorways*
