67R-01 approved and patented

# ALUPIPE

- Aluminium pipe and connections ECE 67R-01 approved and patented available in sizes diameter 6 and 8mm.
- Studied with a special alloying elements such as manganese and silicon.
- Valid alternative to copper pipe in LPG automotive applications.
- 3 times lighter than copper pipe, with a reduction in weight of 100 grams per meter
- Malleable and fast to be installed.
- Great resistance to pressure and mechanical stresses.
- High resistance to chemical agents and corrosion.
- No sparks in eventual shock events.
- It's recommended to install using only the appropriate Faro ALUPIPE fittings available in various sizes.
