TECHNICAL INFO Nr. 55

28 April 2014

Dear Customer,

in the restricted area of Landi Renzo website is available the new <u>SW Omegas, release 3.1.0</u> which is joining at the moment the actual 2.16.9 version and it will replace this in the close future.

The new SW release 3.1.0 introduces new functionality which not allow the use of the SW to not authorized users and protects officials LR workshops.

After installing of the new SW each user must register the SW (proper procedure to register the SW in reported here below, its needed to have internet connection). In the case internet connection is not available user can follow the alternative procedure with short code, contacting his dealer who will requests to Landi Renzo the unlock code).

All the new features introduced with the new SW will require to reprogram the ECU with the latest FW released with the SW itself.

Newest FW included in the SW release:

OMEGAS 3-4 cyl:	LRE194_#00440.plr
OMEGAS 5-6-8 cyl:	LRE198_#00540.pln
OMEGAS EVO:	EVO_#00950.ple
OMEGAS3:	OM3_#00590.ple

To be noted: Once reprogrammed the ECU with the latest FW will not be longer possible to connect to the ECU with the 2.16.9 and older SW

New Functionality introduced:

- Valid License is required to open the SW. License must be required via internet registering the SW, or via e-mail (only registered users).
- Connection and tuning of new "OMEGAS3" system
- Possibility to activate service reminder functionality (OMEGAS3; EVO)
- Possibility to diagnostic functionality of EVs and Switch in the page "Diagnosis" (OMEGAS3; EVO)
- Introduced possibility of select "LANDI EVO" e "LOVATO J" injectors (OMEGAS; OMEGAS3; EVO)
- Introduced possibility to take rpm by injection pulses (OMEGAS, OMEGAS3; EVO)
- Introduced possibility to get rpm connecting brown wire to the cam sensor signal (OMEGAS, OMEGAS3; EVO)

- Introduced possibility to increase EVs opening advance (OMEGAS3; EVO)
- Introduced possibility to set EV1 opening advance time (OMEGAS3; EVO)
- Introduced possibility to set EV2 opening time (OMEGAS3)
- Introduced possibility to manage STAP using EV2 wire (OMEGAS3)
- Introduced K-factor self adjustment for injectors LANDI, LANDI 2.0 e LANDI-EVO (OMEGAS3; EVO)
- Introduced strategy "increase max current at change over" (OMEGAS; OMEGAS3; EVO)
 The strategy improves the first change over to gas in case of injectors partially stuck from moistures in the technical functionality limit
- Introduced possibility to enable/disable injectors warming up and set gas pressure threshold to inhibit. (OMEGAS; OMEGAS3; EVO; EVOL)
 Strategy inhibits warming up over a pressure threshold
- Introduced possibility to set pressure threshold for enabling pressure discharge in cut off (OMEGAS; OMEGAS3; EVO; EVOL)

The strategy already present for LPG can be now enabled and disable and thresholds can be set.

Complete manuals of the new SW will be soon available.

▲ COSTUMER REGISTRATION AND LOADING OF THE LICENSE

Landi Renzo Omegas X LANDIRENZO Product name User code Load a new license Load a new license Delete current license Dx	To use the program you must be registered.
